### ABOUT HABITAT FOR HUMANITY

Over 2 billion people in the world live in poverty housing. Consequently, they are often ill, struggle to earn a living, buy food or medicine or send their children to school. Living in poverty housing keeps people poor, dependent and vulnerable.

Habitat for Humanity works with communities in 90 countries round the world to help them solve their own housing issues through designing and running appropriate projects. Having a safe, decent place to live helps people to permanently break free from poverty.
